

SEATRAIN

The specialist Maritime Education and Training Provider for Africa's Offshore and Shipping industry

www.seatrain.co.za

Africa's oil and gas reserves are largely untapped and so, we believe, is the potential of its people to serve this industry.

We are a specialist maritime training and education provider based in Cape Town, South Africa – a world-class city and the ideal choice for sub-Saharan African companies looking for a specialist maritime training provider in a convenient, cost-effective, English-speaking location.

All mandatory training and education is fully accredited by SAMSA, the South African Maritime Safety Authority, and therefore fully compliant with STCW 2010 (Manila amended) requirements.

Seatrain's MANAGEMENT & ADMINISTRATION services for Officer, Cadet and Rating training include:

- Design, facilitation and management of Accelerated Cadet and Ratings training programmes and submission of applications to SAMSA for accreditation.
- Letters of invitation for Study Visas/Permits.
- Logistics (Travel arrangements, airport transfers, local transport requirements).
- Accommodation arrangements.
- Scheduling training with accredited training providers.
- Financial management of training programmes including: training budget compilation, settlement of all expenses including payment of student/trainee monthly salaries/allowances, budget and expenditure control, detailed monthly reports covering all expenses incurred. All administration and expenses are centralised through one office for client convenience.
- Performance management of students/trainees and training service providers.
- Regular, reliable communication between students/trainees, training providers, client and Seatrain to enhance training performance.

WHAT WE OFFER

We are a wholly-owned subsidiary of the acclaimed South African Maritime Training Academy (SAMTRA), a company specialising in numerous skills development and simulation training programmes.

Our service offering is broad and tailored to industry needs and includes:

1 Designing and managing local content programmes such as:

- English language studies
- Tertiary studies for SAMSA certification of Competency/Proficiency of Ships' Officers/Ratings/Offshore personnel
- STCW short courses
- Business unit required courses (such as ASD Tug Familiarization/Handling, BRM/ERM, Mooring Master, OERTL/OERTM, MARPOL and more)

We also customise maritime training and education solutions according to our clients' specific needs.

2 Meeting and managing students/trainees while they are in South Africa

This service includes providing additional tutoring, where required. Tutoring is provided by Master Mariners/Chief Engineers for students who may experience academic challenges with their studies towards a Certificate of Competency.

Regular visits to the various training/education facilities also ensure that problems are timeously identified and addressed with very limited need for involvement by the clients, as Seatrain's management and staff are sufficiently experienced to deal with these.

QUALITY MANAGEMENT SYSTEM

Seatrain Consulting operates within the parameters set out in SAMTRA's Quality Management System in compliance with the ISO 9001:2008 standard and certified by Bureau Veritas.

BV Certificate accreditation officially incorporates Seatrain Consulting as part of the SAMTRA QMS.
